14MM CARAMEL OAK

real wood engineered
flooring

Image represents 3m²

SPECIES:	European Oak
FINISH:	Oiled, Smoked, Brushed, Sanded Knots
SIZE:	190x1820x14mm / 3mm wear layer

Colour and grain

Colour:
This product is a fumed product (ammonia treatment). The reaction on the wood which gives the darker colour is dependent on the tannin content of the wood (the more tannin, the darker the result). The tannin content depends on the origin of the oak but even trees from the same forest have a different tannin content. So a fumed product always gives you more colour variation than a stain, but the tone is far warmer, highlights character and helps bring nature into your home. Flooring must be mixed well to achieve a balanced look.

Grain:
The product contains D+ grade with large repaired sunken knots and small unrepaired splits to add character to the product.
Variations within species and grades: Open with longer rays than red oak. Occasional crotches, swirls and burls. Plain sawn boards have a plumed or flared grain appearance.
